FACULTY OF ENGINEERING AND TECHNOLOGY

ASSIGNMENT SUBMISSION FORM

PROGRAMME : Bachelor of Information Systems (Honours) (Data Analytics)

SEMESTER : Year 3 Semester 2

SUBJECT : SEG3203 Internship

DEADLINE : 24 April 2026

INSTRUCTIONS TO CANDIDATES

- This is an individual report.

IMPORTANT

The University requires students to adhere to submission deadlines for any form of assessment. Penalties are applied in relation to unauthorized late submission of work.

- Coursework submitted after the deadline but within 1 week will be accepted for a maximum mark of 40%.
- Work handed in following the extension of 1 week after the original deadline will be regarded as a non-submission and marked zero.

Lecturer's Remark (Use additional sheet if required)

I Ooi Jin Yon (22039069) received the assignment and read the comments.

..... (18/1/2026)

Academic Honesty Acknowledgement

"I Ooi Jin Yon verify that this paper contains entirely my own work. I have not consulted with any outside person or materials other than what was specified (an interviewee, for example) in the assignment or the syllabus requirements. Further, I have not copied or inadvertently copied ideas, sentences, or paragraphs from another student. I realize the penalties (refer to page 16, 5.5, Appendix 2, page 44 of the student handbook diploma and undergraduate programme) for any kind of copying or collaboration on any assignment."

..... (18/1/2026)

Data Protection

The protection of personal data is an important concern to Sunway University and any personal data collected on this form will be treated in accordance with the Personal Data Protection Notice of the institution.

1.0 Introduction

An internship is an important part of my Bachelor of Information Systems (Honours) (Data Analytics) studies. It provides me with the opportunity to gain practical working experience in a real-world scenario. Through this internship, I was able to apply the theoretical and practical knowledge that I learned in university to real-world situations. It also helps me develop important skills such as communication, problem solving, and teamwork.

I have completed my internship as a Development Plan Intern at Sunway College (KL) Sdn Bhd under the Sunway House Student Residences Resident Community Team from 19 January 2026 to 17 April 2026. During this period, I am assisting the residence management team in analysing the rule violation cases from the previous year to better understand the common issues occurring within the residence community with some potential solution by data analysis and research. Other than that, I was given the task on reading and understanding the StarRez Community Module. This is a part from the StarRez Residence Management Software, which focuses on managing disciplinary case and reward system. Moreover, I also given the task to help facilities management team to produce an inventory management and license expiry alert system using Microsoft Power App. In addition, I contributed to analysing the door lock case issues that happened in the residence by analysing the data reported by the security team for January 2026 to March 2026 to identify trend and find some clue. Last but not least, I also assisted in events held by our team during this three-month period.

1.1 Organization Structure

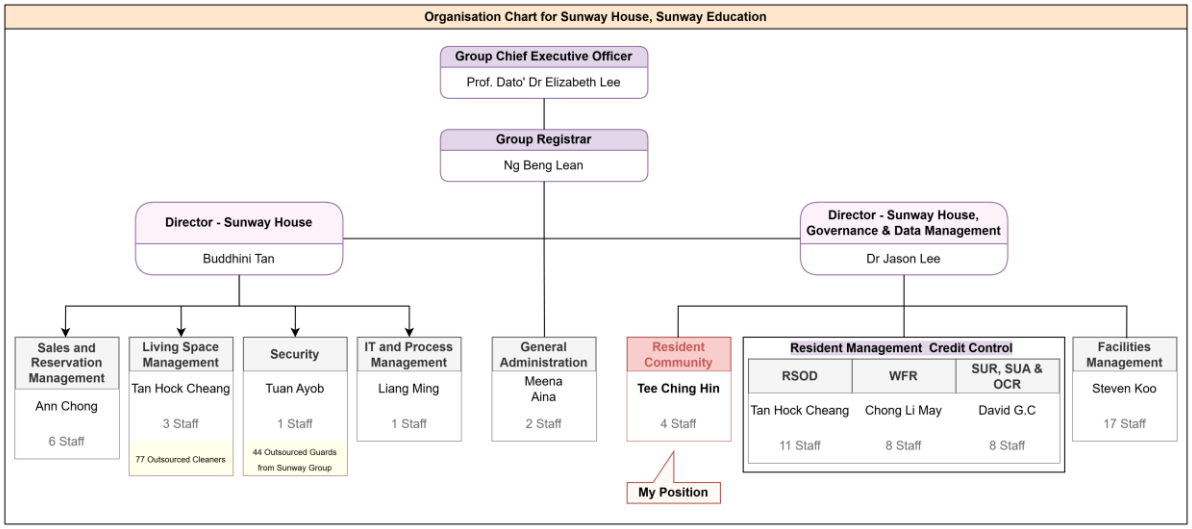

Figure 1 - Organisation Chart for Sunway House, Sunway Education

The organisation chart above shows the organization structure of Sunway House, Sunway Education in Sunway College (KL) Sdn Bhd. I am currently positioned as an intern within the Resident Community Team under Governance and Data Management Department. The organization is led by the Group Chief Executive Officer, Prof. Dato' Dr Elizabeth Lee and the group registrar, Ng Beng Lean. Meanwhile, the director of our department is Dr. Jason Lee, who is responsible in managing in this department.

Within this structure, the Resident Community Team have four staff members and play a crucial role in managing the resident-related stuff and community engagement within Sunway House Student Residence. As an intern, my position is to support the teams in tasks related to data analysis, research and system improvement. At the same time, I also helped in the events and carrying out other operational tasks as required. This placement allowed me to gain a better understanding of the team's responsibilities and how their work contribute to maintaining a well-managed residential environment.

2.0 Work Portfolio

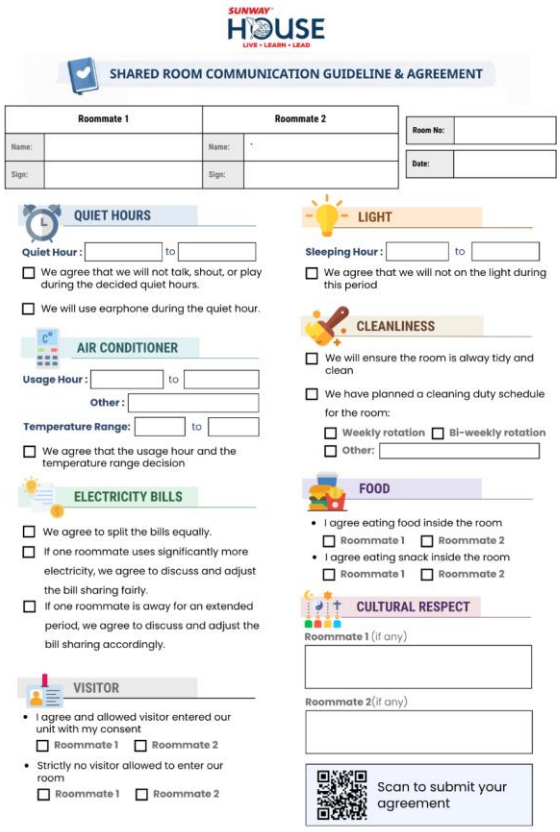

2.1 Discipline Case Analysis

This was the first task I received from my supervisor, which I need to analyse the discipline cases recorded in the previous year within Sunway House Student Residences. The purpose of this task was to identify the top issues happening within the residence to understand the issues. During the analysis, I reviewed the incident records and categorised them based on their types and sub-categories to identify the trends to see what the most frequent issues in the current situation are. After that, I have started the research on the human behaviour and solution as suggestion for the company. Besides that, they also asked me to draft a shared-room communication guideline and agreement as there were too many requests on change units due to roommate issues. I summarized my analysis and research finding and presented to them on 4 February 2026 during the monthly team meeting. Due to data confidentiality and privacy considerations, I was not permitted to share the actual data with external parties. Figure 2 provides an overview of the disciplinary case analysis slides used during the presentation and Figure 3 shows the agreement and guideline I developed.

After I finish my presentation, the team requested further research into the demerit point system that I had stated as one of my solutions for the regulation. I researched the demerit point system from different universities or school hostels to provide them as references. I also drafted the demerit point system based on their current rules for their consideration. And the presentation is carried out on next meeting.

Figure 2 – Overview of Disciplinary Case Analysis Slide

SUNWAY HOUSE
LIVE • LEARN • LEAD

SHARED ROOM COMMUNICATION GUIDELINE & AGREEMENT

Roommate 1		Roommate 2	
Name:		Name:	
Sign:		Sign:	

Room No:	
Date:	

QUIET HOURS

Quiet Hour : ____ to ____

- ☐ We agree that we will not talk, shout, or play during the decided quiet hours.
- ☐ We will use earphone during the quiet hour.

AIR CONDITIONER

Usage Hour : ____ to ____

Other : ____

Temperature Range: ____ to ____

- ☐ We agree that the usage hour and the temperature range decision

ELECTRICITY BILLS

- ☐ We agree to split the bills equally.
- ☐ If one roommate uses significantly more electricity, we agree to discuss and adjust the bill sharing fairly.
- ☐ If one roommate is away for an extended period, we agree to discuss and adjust the bill sharing accordingly.

VISITOR

- I agree and allowed visitor entered our unit with my consent
  - ☐ Roommate 1 ☐ Roommate 2
- Strictly no visitor allowed to enter our room
  - ☐ Roommate 1 ☐ Roommate 2

LIGHT

Sleeping Hour : ____ to ____

- ☐ We agree that we will not on the light during this period

CLEANLINESS

- ☐ We will ensure the room is alway tidy and clean
- ☐ We have planned a cleaning duty schedule for the room:
  - ☐ Weekly rotation ☐ Bi-weekly rotation
  - ☐ Other: ____

FOOD

- I agree eating food inside the room
  - ☐ Roommate 1 ☐ Roommate 2
- I agree eating snack inside the room
  - ☐ Roommate 1 ☐ Roommate 2

Figure 3 – Shared Room Communication Guideline & Agreement

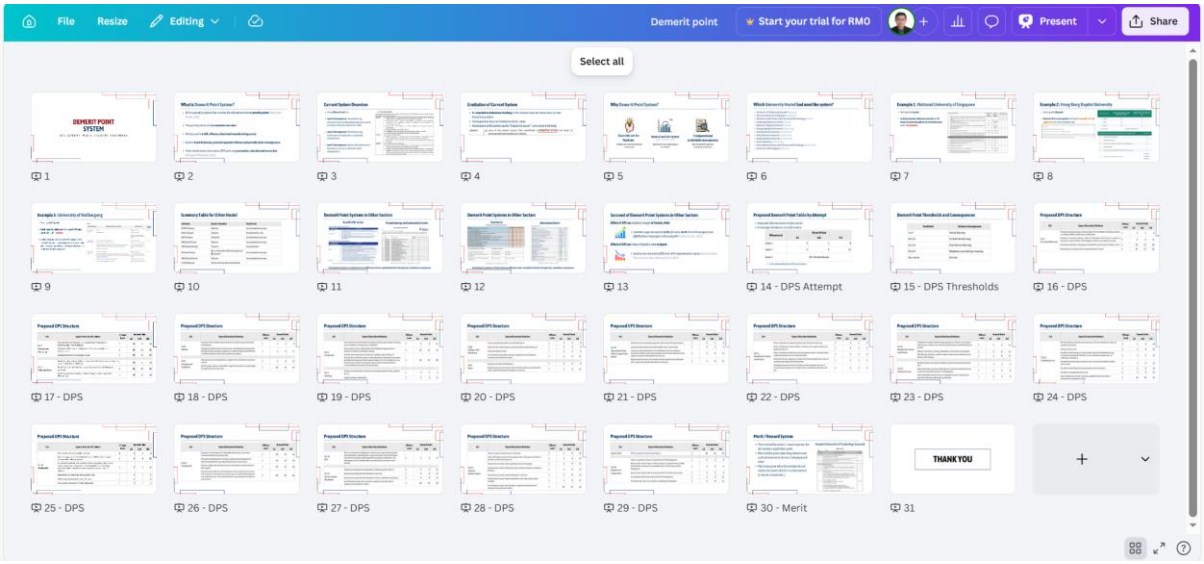

Figure 4 – Overview of Demerit Point System Presentation Slide

2.2 StarRez Community

My second task I was assigned is to explore the StarRez Community Module. StarRez is a residence management system software that manages the entire resident lifecycle from applications until they move-out. For the community module, it focuses on recording and managing disciplinary cases within the residence. The purpose of this task was to explore how the system functions and evaluate its effectiveness in supporting residence management operations. Most of the system used in Sunway House Student Residences have already been integrated into the StarRez platform. For example, the application management and payment processing are now on StarRez platform.

During this task, I studied the workflow of the StarRez Community Module, particularly how cases are reported, investigated and managed within the system. My supervisor gave me the access to the StarRez Community Module Leaning Platform for me to understand it. During I learned from the module, I analysed how the module structures incident records and tracks case progress and compared it to the existing approach. After completing my research, I started to prepare presentation slides to explain the functionality of the StarRez Community Module and shared the findings with the team. This assisted the team to decide on switching the system or not. By the end, the team decided to continue using Excel, as the StarRez module did not offer a significant increase in operational efficiency. Figure 5 have shown the overview of the presentation slide that I had prepared.

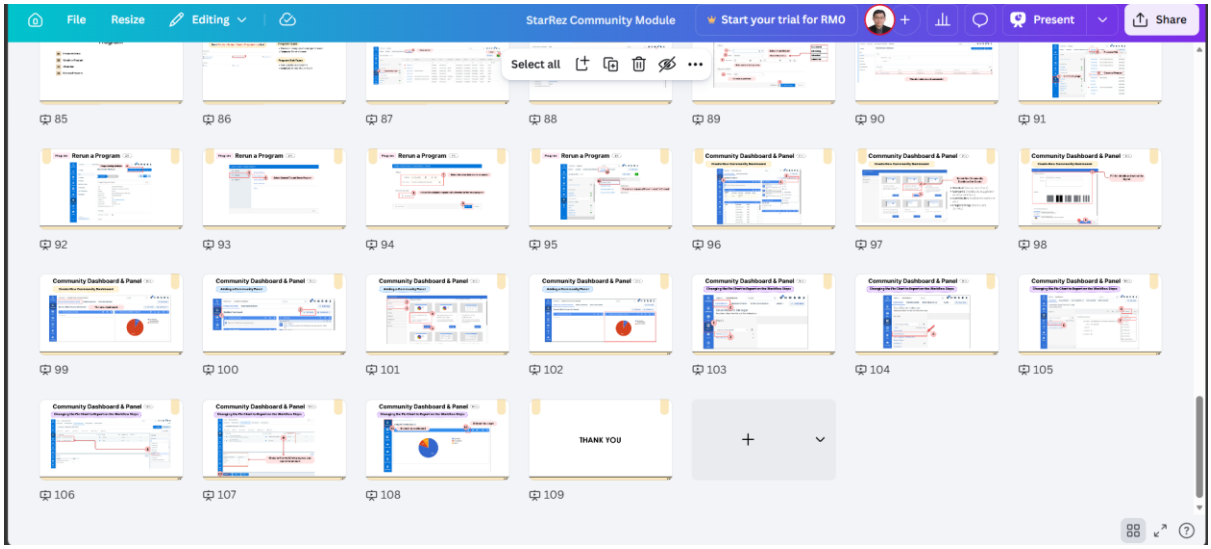

Figure 5 – Overview of StarRez Community Module Manual Guide Slide

2.3 Power App Development

After completing the StarRez Community Module task, I receive a request from the director, where I will assist facility team to develop an inventory management system using Microsoft Power Apps. My supervisor approved this and allowed me to help them. First of all, I read and explored the Power Apps to have a better understanding on how it worked. After that, I started to develop a simple demo of the inventory management system. This power apps demo allowed user to add and edit the inventory items. Besides that, the application allowed users to print out specific item report. Moreover, it able to send low stock alerts when an item is on the minimum level using Microsoft Power Automate. After I show the demo to the facilities management team at the first meeting, they approved the application and request further development.

They provide feedback, which include adding asset tab for important asset, asset replacement form, access control based on role and residence and all inventory report. After completing the application and presented to them in the second meeting, the director asked to add one more feature on recording license and tenancy expiry date and alert them when the expiry date is close. After I completed all the feature, I transferred the application to the facilities management team. Figure 6 show a page of the application in developer view, figure 7 show the Power Automate flow for license and tenancy expiry email alerts and figure 8 show the Power Automate flow for low stock email alerts.

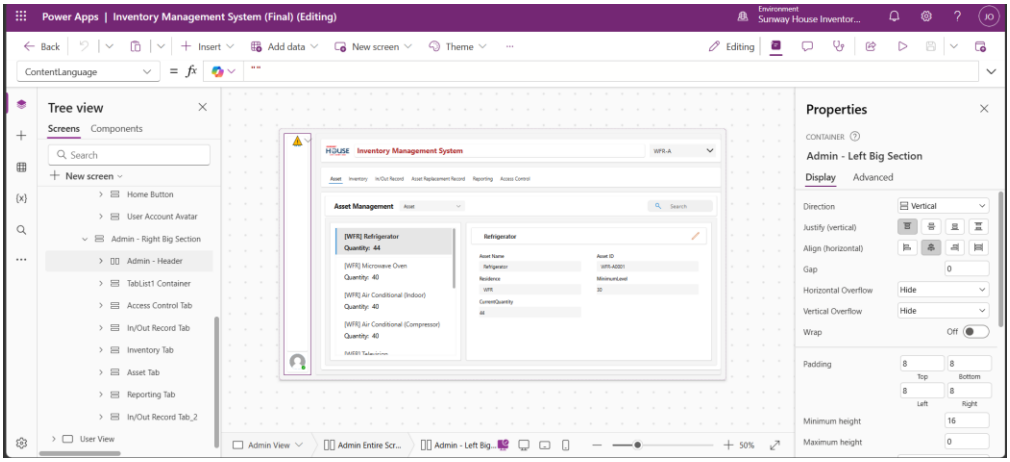

Figure 6 – Power App Interface in Developer View

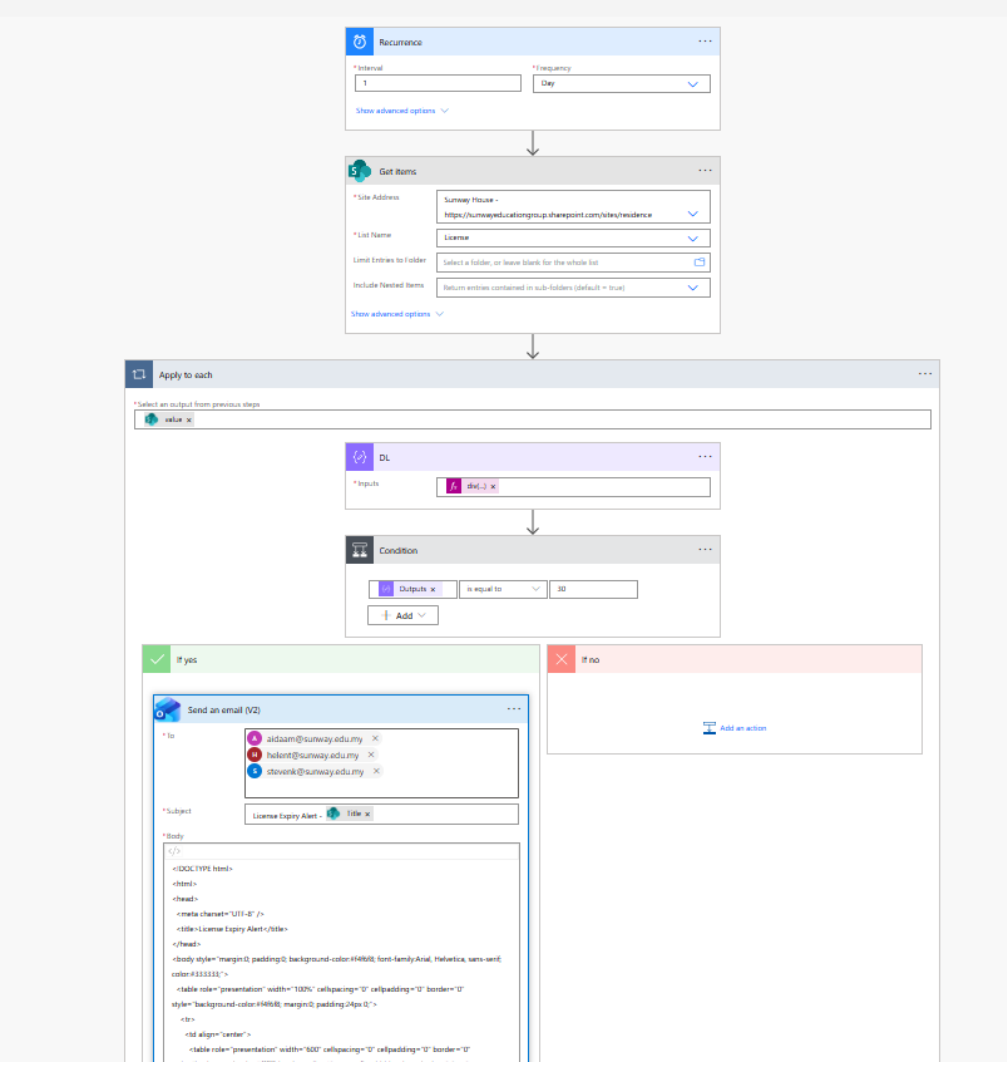

Figure 7 – Power Automate Flow for License and Tenancy Expiry Email Alerts

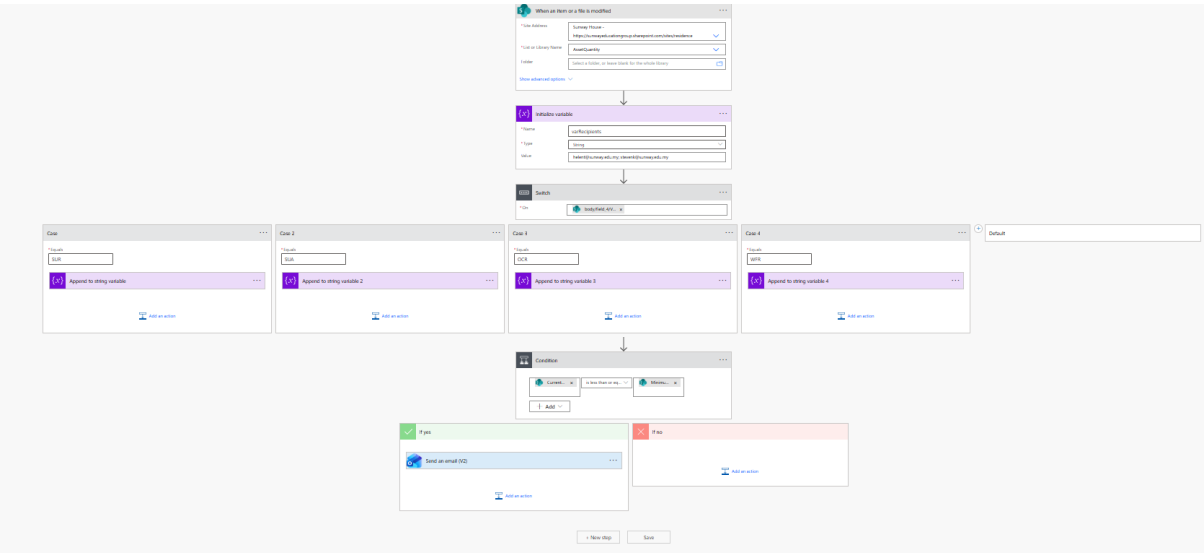

Figure 8 – Power Automate Flow for Low Stock Email Alerts

2.4 Residence Door Lock Issue Analysis

After completed the application, I received my final task to analyse and research the residence door lock issue. I received the data from security team that starting from 29 December 2025 to 5 April 2026. The objective of this analysis was to identify the trend and reason resident's do not lock their main door. Firstly, I have clean and export the data into Excel files. After this, I use pivot table to make graphs to compare statistics across different residential blocks and gender to find insight. Besides that, I filtered the data to identify the top 10% of units with the highest frequency of door lock issues. By doing this, it is narrowing down specific areas that require more attention on this issue.

After this, I began researching why residents exhibit this behaviour. Based on my research, I found these issues may align to perception of risk and effort reduction. The residents may assume the residence as highly secure environment, and they need another access card verification for their own room. Thus, they think the main door is not necessary to be closed, which also bring convenience to them. Besides that, it also can align with broken window theory. This happened when the other residents observe that the unclosed door is very common and go unaddressed. This causes the norm widespread in residence. Last but not least, it may also align with social norm theory, where the new residents may learn and adopt these behaviours from existing residents when no serious actions are taken. Over time, leaving the door unlocked becomes a "default" option for all residents in the future.

Lastly, I began preparing a questionnaire for my supervisor to collect responses from the residents regarding these issues. I combined general questions with specific questions related to the three theories mentioned above to validate the research findings. Due to data confidentiality and privacy considerations, I was not permitted to share the actual data with external parties. Figure 9 shows the

screenshot of entire dataset I had key in and clean from the security team and figure 10 shows the draft for the survey.

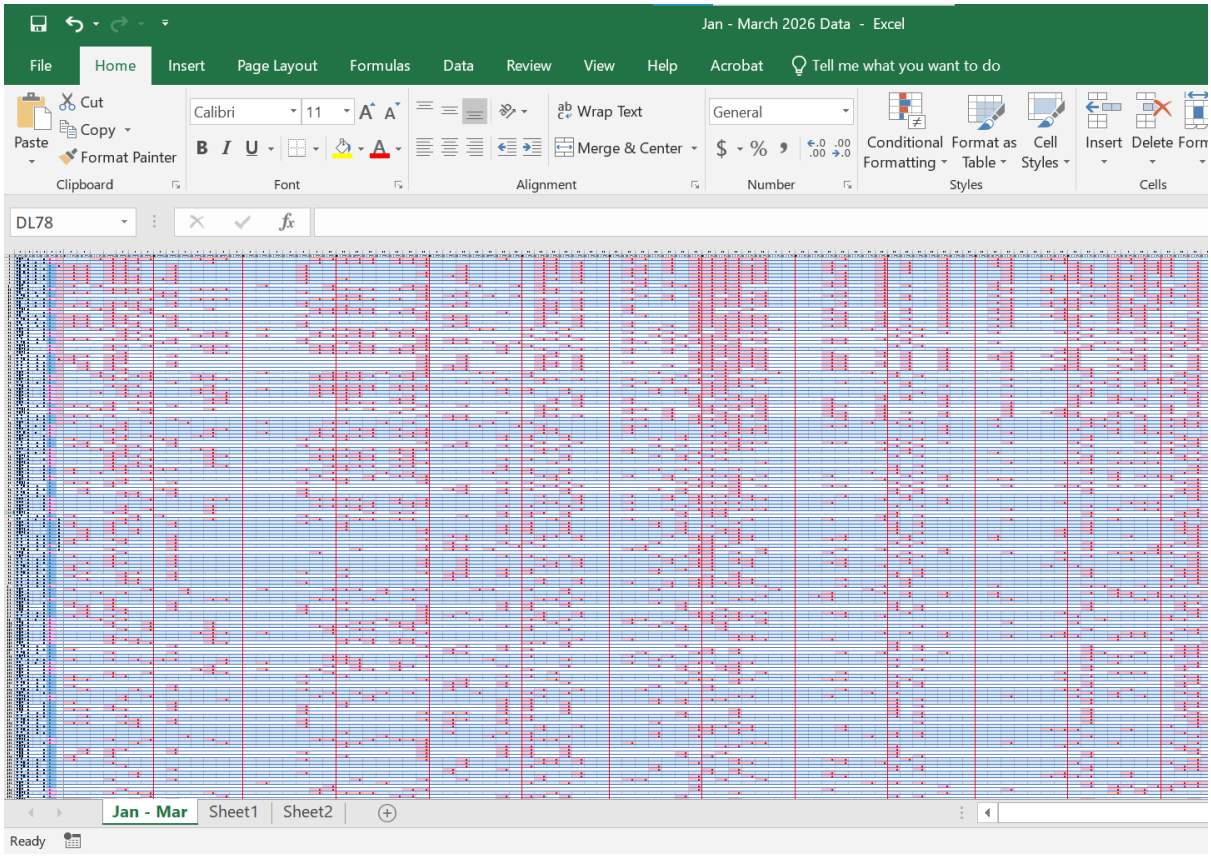

Figure 9 – Overview on the Excel Data

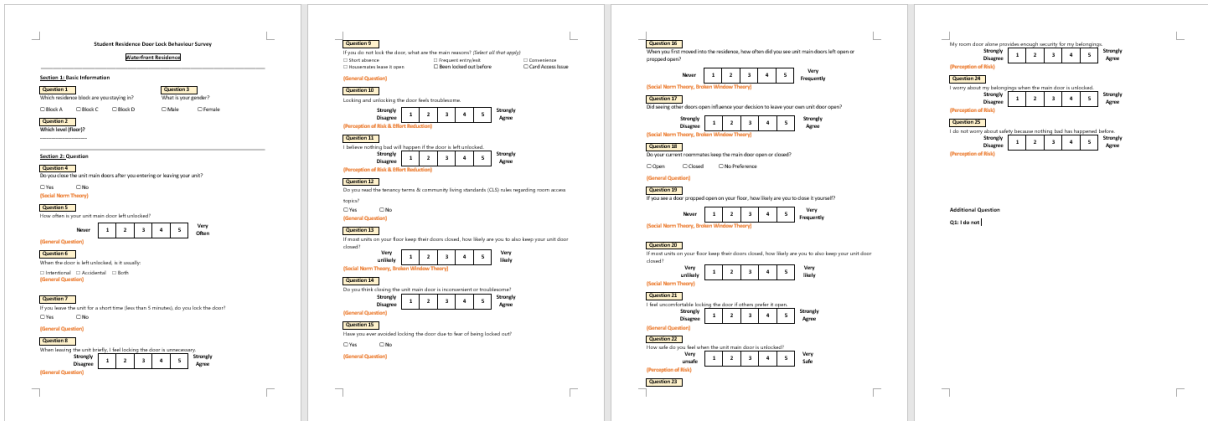

Figure 10 – Draft of Student Residence Door Lock Behaviour Survey

2.5 Other Task

Other than these main tasks, I also helped in the daily operations of the team. During my three-month internship, I had contributed to 6 events, which is Chinese New Year Celebration, Iftar Gathering,

Solidarity Gathering, Birthday Party, “Aloha Waterfront!” event and Hari Raya Open House Event. In these events, I assisted in arranging the booth item and take duties in registration booth. After the event, I compiled and recorded all participant attendance data into Excel file.

3.0 Knowledge and Skills

During my internship, I developed technical and analytical skills through hands-on experience in system development, data analysis and research. One of the technical skills I acquired was using the **Microsoft Power Apps**. This is the platform that enables user to build their application or website. By using this platform, I was able to build, design and develop an application that supports their inventory management and license expiry alert system. Besides that, I also learned new skills in using the **Microsoft Power Automate**, which help to automate triggers a command within a workflow. Moreover, I have learned industry-specific knowledge on a residence management system, which is **StarRez**. I was also able to further develop my data analysis and research skills through various residential improvement projects. Last but not least, I gained my first experience in a real workspace.

3.1 Microsoft Power Apps

I have learned to use Microsoft Power Apps to build and design a custom application on inventory management system with license and tenancy expiry date alert system. I explored the platform’s developer view to create a user-friendly interface that allow the facility management team staff to have record and edit the inventory item quantity, print the reports and set up the license and tenancy expiry date alert system. The programming principles and business analytics subjects I had taken before helped me gain a better understanding of the programming logic and the Excel-like language used within the Power Apps environment. This application of academic knowledge allowed me to bridge the gap between user requirements and technical implementation in a professional setting.

3.2 Power Automate

I also acquired skills in Microsoft Power Automate when I was creating automated alert email workflows and a report generation workflow that transforms Word documents into PDFs. I designed flows that trigger email alerts to specific person on their respective residence when an item reaches minimum stock levels or when a license or tenancy is nearing its expiry date. By having this experience, I understand how Power Automate help to enhance operational efficiency by avoiding stock-out situations and preventing license or tenancy expirations.

3.3 StarRez Residence Management System

I gained industry-specific knowledge by reading and understanding the StarRez Community Module from its learning platform. This is one of the parts from the system, which focuses on managing disciplinary cases and resident reward systems. I understand how this system records the cases from the beginning to the end and compared the difference with traditional Excel-based methods. This allows me to understand the advantages and limitations of specialized management software versus the manual workflows. This developed my ability to critically evaluate operational tools based on the team's needed and resource constraints.

3.4 Data Analysis Skill

My data analysis skills were further developed by processing large real-world datasets, which is the incident cases for 2025 and the door lock issue records from January to March 2026. By using the skill I learned in business analytics subject, I able to use Excel to clean the raw data from the disciplinary cases data as the file contain different categories and sub-categories. I standardised these terms to ensure the data was structured for better analysis. Additionally, I used pivot tables to summarize the incident types and identify which rules violation had the highest frequency. Besides that, I also used a combination of pivot table and conditional formatting to find the top 10% units with the highest frequency of door lock issues. Thus, my data analysis skills that I learned at university had successful applied in the workplace to extract actionable insights from raw data.

3.5 Research Skill

I developed my research capabilities by finding solution for residential management issues. For the disciplinary case analysis, I conducted research on demerit point system implemented in different educational institution's hostel to provide strong reference to the team. This enabled me to propose evidence-based recommendations for updating the residence's current policies. Furthermore, I researched the psychological concepts such as broken window theory and social norm theory to understand the resident behaviour on door lock issues. This allowed me to design survey to validate my findings and understand why this happened.

3.6 Communication and Presentation Skill

During this internship, I shared my findings and my application to the team. I used the technique that I learned in my university communication skills classes in the real office environment. This experience was significantly different from presenting in front of a class. To overcome these challenges, I learned to prepare scripts to structure my points and ensure no important information was missed during professional meetings.

4.0 Self-Analysis and Criticism

I consider my overall performance during this three-month internship to be highly productive and successful. I able to complete all the tasks assigned to me, including analysing discipline cases, understanding the StarRez Community Module, developing a customised inventory management application for the Facilities Management Team and analysing the residence's door lock issue.

From this internship, I successful work independently and take initiative in completing assigned tasks. My supervisor also comments on my capability in handling complex problems and providing practical solutions. These experiences reflected my ability to apply both technical knowledge and analytical thinking in a real working environment.

However, there were some areas that I could improve which is my communication skills. I found that I am difficult to explain my ideas clearly during the presentations. I should practice by preparing scripts to structure my points logically to ensure no important information was missed cause confusion. Besides that, I also need to improve my confidence when presenting or talk to other. I felt nervous when I wanted to communicate with other. This affected my explanations cause them not understanding what I want to tell. Thus, I need to plan for more practice and seek feedback from other to improve my presentation skills.

Overall, this internship has allowed me to identify both my strengths and areas for improvement. This helped me become more independent, adaptable, and confident. This experience help me to have better preparation for my future professional environments.

5.0 Career Preparation

5.1 Pre-Internship

5.1.1 Compulsory Events

1. **April Internship Briefing**

   This is a compulsory internship briefing from the school on 28 April 2025. During this briefing, we have known the detail of internship placement due date, internship application flow and the form that we need to submit when we apply for internship placement to the school.

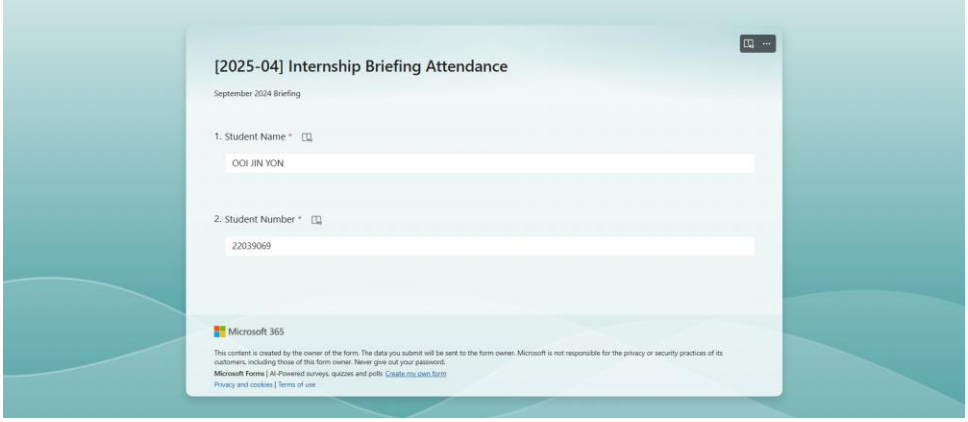

Figure 11 – Attendance Record

2. September Internship Briefing

This is a compulsory internship briefing from the school on 26 September 2025. During this briefing, we understand what internship event we need to attend and record in our internship report, which includes this meeting. Besides that, we also aware that we need submit New Employer Request Form if the company is not inside the list. After approval, we can submit the Placement Confirmation Form in career portal. Moreover, we are required to write a weekly logbook and internship report for our assessment.

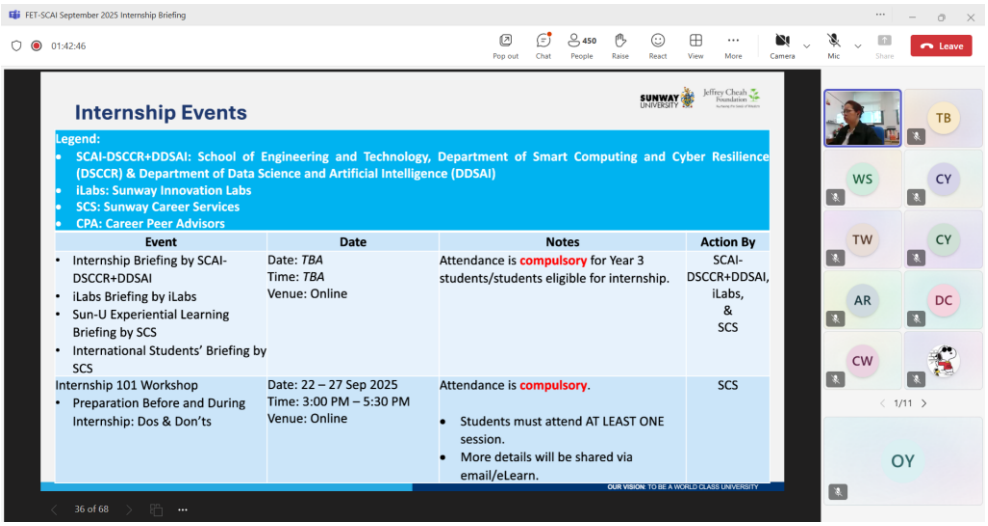

Figure 12 – Screenshot from briefing

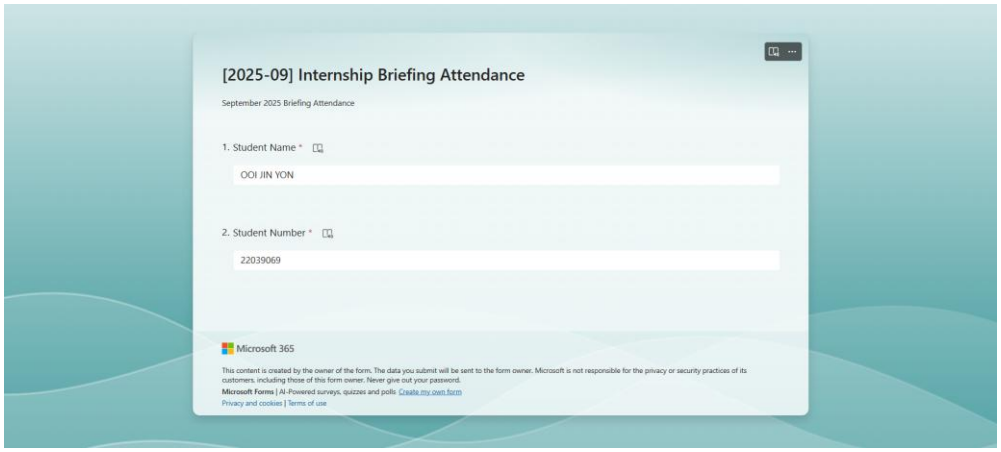

Figure 13 – Attendance Record

3. Internship 101 Workshop 2026 Batch

This is the workshop on 26 September 2026 from Maybank. They have guide us on some interview guideline, which is the recommended practices and common mistakes to avoid during interviews. Besides that, they also discussed on verbal and non-verbal communication, as well as appropriate interview attire. Lastly, they have a Q&A session for us to ask questions.

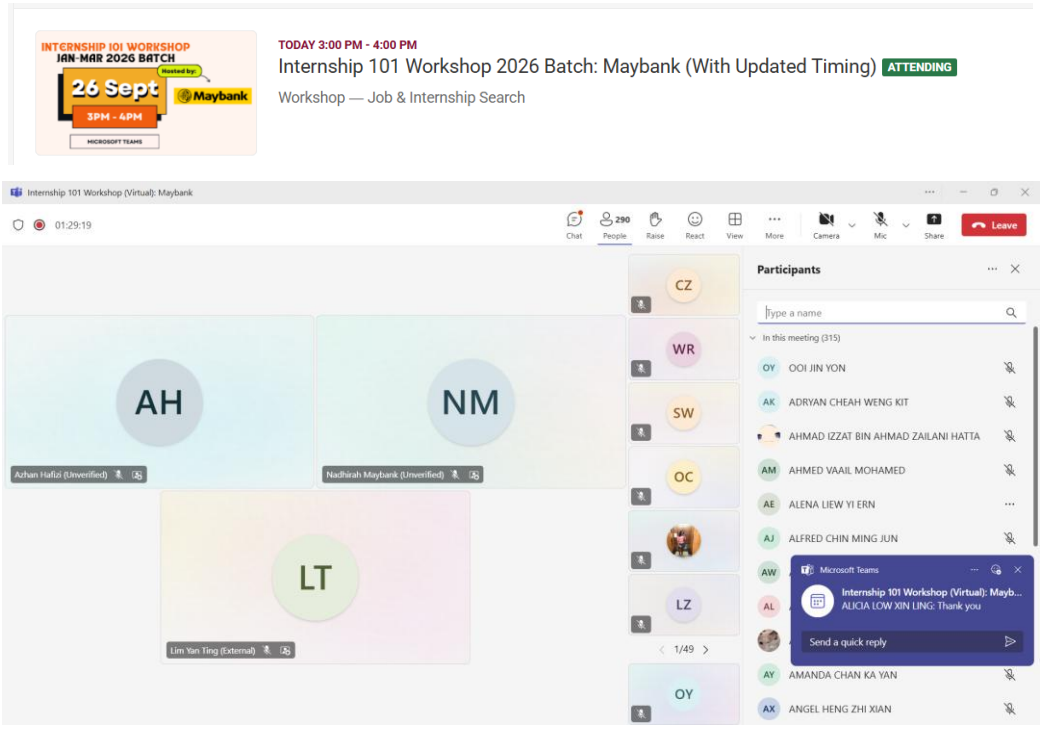

Figure 14 – Registration and Screenshot

4. Sunway Get Hired Career Fair Prep Days

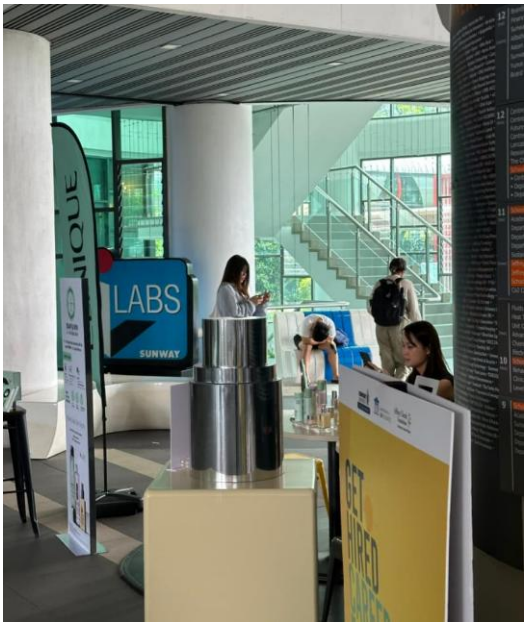

Figure 15 – Attendance Record

5. STEM Career Fair

This is the Sunway STEM Career Fair that held on 20 November 2025 in Jeffrey Cheah Hall. My friend and I went to the event together to speak with companies to understand more about the current world situation so we can prepare well for our first internship. Besides that, we also sought for internship opportunities during this career fair.

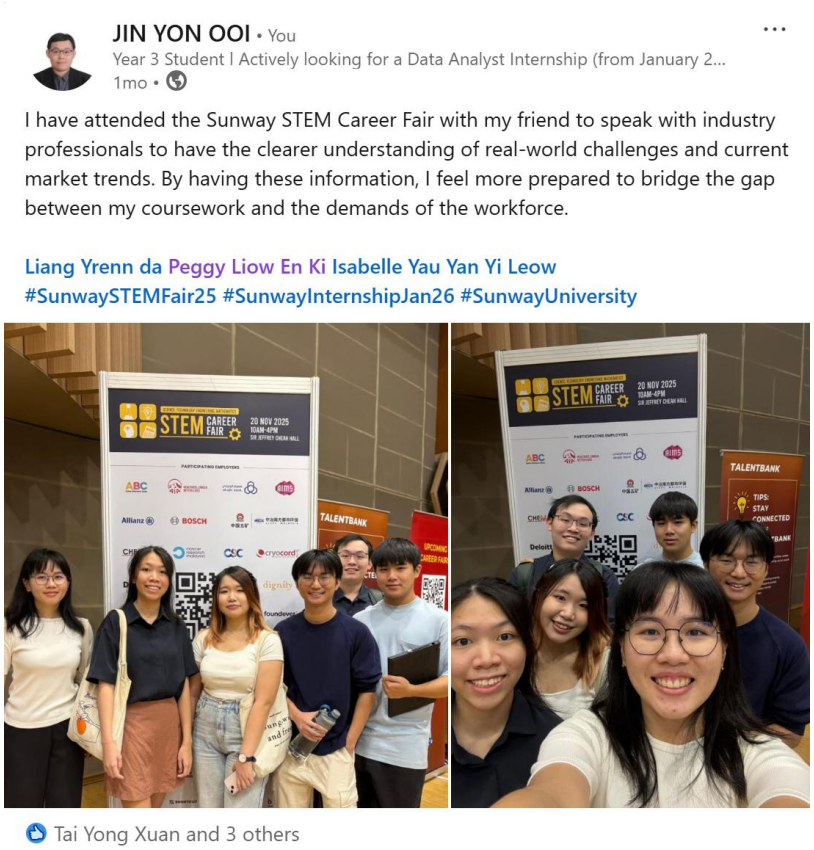

Figure 16 – LinkedIn Post

5.1.2 Placement Application

I started my internship placement application by finding the internship job position from different platforms such as eLearn, JobStreet, Indeed, Hiredly and Sunway Career Website during July 2025. I focused on finding internship position related to data analytics, business intelligence and information technology, which is related to my course and align with my programme requirements and career aspirations. To obtain an internship position efficiently, my friend and I have created a shared Google Sheets document to share and list down available internship opportunities for us to apply. There is total 111 companies that we have founded together. From there, I have submitted applications to 60 companies.

The first reply I received was from FWD Insurance Berhad. I was invited for an interview on 30 October 2025 for the Business Intelligence Intern position. During the interview, I have been asked about some questions related to Microsoft Excel. Besides that, they also asked about my cocurricular activities and my teamwork related questions. On 3 November 2025, I was informed by them where their boss approved me to join the company. However, the offer letter was not issued at that time. I had made some follow up on 12 November 2025 and 2 December 2025. Eventually, I was informed that

they would not take any intern for January 2026. This experience provided me valuable insight of importance in securing the offer letter ant not relying on the verbal confirmation.

The second response I received was from Sunway Registry. I agreed to attend an interview with them in Sunway College on 4 December 2025. During the interview, they have asked me about my technical skills in analysis the data. Thus, I have shown them what I have done in Tableau doing my free time. Besides that, they asked me some questions to test me whether understand what their department are doing. However, the interviewer told me they only accept one intern. I was informed that I would be contacted within a week if I was selected for this position. However, I was not selected for the role.

I have written my first email to my internship coordinator on 16 December 2025 to request extra extension until 31 December 2025 as I did not get any internship placement. During this period, I continued to apply for other opportunities. I attended interview with Enzee on 26 December 2025. There were other people interview with them at the same time, which allowed me to experience with a different interview format and learn from them. On the same day, I also received a call from Sunway House regarding an internship opportunity. As I have not obtained any internship placement yet, I written email again to request for deadline extension on 31 December 2025.

Finally, I received the official offer letter from Sunway House on 13 January 2026. After that, I proceeded to submit the Placement Confirmation Form. After getting approval from the school, I had successful completed my internship placement application process.

5.2 Post-Internship

After I completed my internship, I gained valuable experience by using my academic knowledge in a real organisational environment. One of the experiences was the technical skills. I learned to develop an inventory management application by using Microsoft Power Apps. This enhanced my understanding of system design and implementation in a practical setting.

In addition, I gained insight into how the StarRez Residence Management System provides a structured and reliable workflow for managing disciplinary cases. This experience helped me understand the importance of having a centralised system to ensure consistency, efficiency, and effective case management processes within an organisation.

I also developed a stronger analytical and problem-solving skills through discipline case analysis and door lock case issues case. Furthermore, I improved my communication and presentation

skills by presenting my findings to the team. These experiences increased my confidence in dandling real-world task and collaborating with other. Overall, this internship experience has strengthened my career direction in data analytics.

6.0 Appendix

6.1 Appendix - Gantt Chart

Internship Gantt Chart	Week												
Activities and Task	**1**	**2**	**3**	**4**	**5**	**6**	**7**	**8**	**9**	**10**	**11**	**12**	**13**
Meet & Greet													
Meet and introduce myself with all staff													
Task 1: Disciplinary Case, Feedback & Suggestion and Special Case													
Understand the tenancy terms & community living standards													
Read and analyse the discipline case record in 2025													
Research solution													
Shared-room communication guideline document													
Prepare presentation slide													
Presentation													
Demerit Point System Research & Presentation													
Task 2: StarRez Community Module													
Read and understand the StarRez Community Module													
Prepare Manual Guide Slide													
Compare current system and StarRez Community Module													
Presentation													
Task 3: Microsoft Power Apps Development													
Explore and understand Microsoft Power Apps													
Draft the Inventory Management System													
Prepare manual guide presentation slide													
Enhance the Inventory Management based on request													
Presentation (1st & 2nd time)													
Develop License and Tenancy Expiry Alert in the same application													
Assist the facility team to familar with the application													
Task 4: Residence Door Lock Issue													
Analyse the Jan - March data that recorded by security team													
Research on human behaviour factor													
Draft the survey													
Hand over the result to my supervisor													
Task 5: Event													
Chinese New Year Event *(26 February 2026 6.00PM - 9.00PM)*													
Iftar Gathering *(10 March 2026 6.00PM - 9.00PM)*													
Solidarity Gathering *(11 March 2026 7.00PM - 9.00PM)*													
Birthday Party for Jan, Feb and March *(26 March 2026 8.00PM - 9.00PM)*													
Aloha Waterfront! *(31 March 2026 7.00PM - 9.30PM)*													
Hari Raya Open House Event *(2 April 2026 6.00PM - 9.00PM)*													

6.2 Appendix - Logbook

Week 1 (19 Jan – 24 Jan 2026) Log

a) Activities / accomplishments for the week:
- Met and familiar myself with all staff members in the office.
- Had discussion with my supervisor regarding my roles and work scope within this 3-month internship period.
- Focused on analysing the 2025 incident cases in Sunway House Student Residences to understand the feedback shared by the residents, and to recommend solutions/ action plans.

b) Top 3 problems encountered for the week and action taken:
- **Problem:** Difficulty in finding solutions to reduce number of cases thus to enhance the current process by the Management.
  Action: Reviewed the incident cases and analyse their frequency based on their sub-category. Besides that, I make research on the residents' behaviour so I can have better understanding on why they break the rules.

- **Problem:** Difficulty in finding solutions from other hostel/residences
  Solution: I asked my supervisor and he recommended me to look for human behavioural, or related research to find out why we do what we do.

- **Problem:** I was not familiar with the rules and policies of the Residence.
  Solution: I had read the latest Residence policies, which is known as Tenancy Terms & Community Living Standards.

c) Plans for the following week:
- Continue to analyse the incident cases and to prepare my presentation slides.
- Start reading the Residence management system, which is StarRez.

Supervisor's remark:

Jin Yon has done a remarkable work in completing the tasks given. He continued to show his independency.

Supervisor signature: 

Date: 24 January 2026

Week 2 (26 Jan – 30 Jan 2026) Log

a) Activities / accomplishments for the week:
- Continued analysing the incident cases and completed my presentation slides.
- Started to read the Residence management system (StarRez) and drafted the presentation slides.
- Prepared for shared-room communication guideline idea presentation.

b) Top 3 problems encountered for the week and action taken:
- **Problem:** The slides regarding StarRez Community Module does not explain the function in detail.
  Action: I told my supervisor regarding the issue and he provided me the StarRez learning website for me to explore.

- **Problem:** I was unfamiliar with the StarRez system.
  Action: I explored the basic functions from the learning website.

- **Problem:** I was certain on the term used in the StarRez and the existing ones in Excel.
  Action: I read the module and identified the similarities and recorded the different terms inside my presentation slides.

c) Plans for the following week:
- Presentation on the 2025 incident cases and the shared-room communication guideline idea.
- Focus on the StarRez Community Module and explore the system.

Supervisor's remark:

Jin Yon continued to show his dedication towards the tasks given.

Supervisor signature: 

Date: 30 January 2026

Week 3 (2 Feb – 6 Feb 2026) Log

a) Activities / accomplishments for the week:
- Presentation on the 2025 incident cases and the shared-room communication guideline idea, to all the members in the team.
- Focused on the StarRez Community Module and explored the system.

b) Top 3 problems encountered for the week and action taken:
- **Problem:** I am having difficulty in explaining ideas clearly during presentation
  Action: I prepared a script to structure my points and ensured that no important information was missed out.

- **Problem:** I was not sure what to include in my StarRez Community Module presentation slide.
  Action: I had asked my supervisor during the weekly meeting on Friday.

c) Plans for the following week:
- Focus on the StarRez Community Module and explore the system.
- Start to prepare the demerit point system research with slide.

Supervisor's remark:

Jin Yon put effort in his presentation and it went well. The team members were impressed with his dedication and efforts he put in.

Supervisor signature 

Date: 13 February 2026

Week 4 (9 Feb – 13 Feb 2026) Log

a) Activities / accomplishments for the week:
- Focused on the StarRez Community Module and explored the system.
- Started to prepare the demerit point system research with slide.

b) Top 3 problems encountered for the week and action taken:
- **Problem**: I am having difficulty in identifying relevant information for the demerit point system research.
  Action: I had conducted additional research and list out the key points to ensure the content was clear and suitable for presentation slides.

- **Problem:** The presentation slide is too long to present during the next meeting.
  Action: I have summarized the important items and move it to a new slide.

c) Plans for the following week:
- Chinese New Year Holiday Break

Supervisor's remark:

Jin Yon completed the tasks given to him before the CNY break. As the holidays were coming up, there's no pending tasks from his end.

Supervisor signature: 

Date: 27 February 2026

Week 5 (16 Feb – 20 Feb 2026) Log

a) Activities / accomplishments for the week:
- Chinese New Year Holiday Break

b) Top 3 problems encountered for the week and action taken:
- Chinese New Year Holiday Break

c) Plans for the following week:
- Finalise my presentation slide for the StarRez Community Module and Demerit Point System.
- Prepare myself for the upcoming meeting presentation
- Start to explore the Microsoft Power App

Supervisor's remark:

NA as it was CNY break.

Supervisor signature: 

Date: 27 February 2026

Week 6 (23 Feb – 27 Feb 2026) Log

a) Activities / accomplishments for the week:
- Finalised my presentation slide for the StarRez Community Module and Demerit Point System.
- Prepared myself for the upcoming meeting presentation.
- Assisted the team to find the international students who did not reply message to the International Office in the unit.
- Started to explore the Microsoft Power App to understand how to use it.
- Assisted with the Chinese New Year Celebration 2026 on 26 February (6 PM to 9 PM).

b) Top 3 problems encountered for the week and action taken:
- **Problem:** I did not get details on what should I do with Microsoft Power App.
  Action: I asked my supervisor about this. He took me to find the right person to understand what they needed. They want to create an Inventory Management Application to record their stock in and out amounts.

- **Problem:** I am not familiar on what I should do during the Chinese New Year Celebration Event.
  Action: I asked the Assistant Manager. She told me I would take care of one of the registration booths. She also guided us on the flow of registration and the website we used for the QR scanning.

- **Problem:** I am not familiar on using Microsoft Power App
  Action: I read the documentation from Microsoft Learning Platform and watch YouTube tutorial video.

c) Plans for the following week:
- Attend the Monthly Meeting and presentation.
- Continue working on the Microsoft Power App and the guidance presentation.

Supervisor's remark:

StarRez Community Modules and Demerit Point System were finalized. Presentation will take place on 03 March 2026. New tasks were also given to Jin Yon to look into development a new app for our Facilities Management team. Apart from that, Jin Yon had also helped to coordinate our CNY Celebration on 26 Feb, mainly in charge of the Registration booth and decoration. He was also helping us to locate residents in the Residence.

Date: 27 February 2026.

Week 7 (2 Mar – 6 Mar 2026) Log

a) Activities / accomplishments for the week:
- Attended the Monthly Meeting and presented StarRez and Demerit point system to the team.
- Worked on the Microsoft Power App and the manual guides.

b) Top 3 problems encountered for the week and action taken:
- **Problem:** I faced difficulty in arranging the app layout in Microsoft Power App
  Action: I have searched YouTube Video for tutorials to gain better understanding.

- **Problem:** I faced difficulty in writing the codes to enable the "Print" button so that it could generate an Inventory In/Out Report. Current issue was that I was able to download the report, but the inventory details were missing.
  Action: I have searched YouTube Video for tutorials and explored the community platform available in Microsoft to learn more from other user's experience.

c) Plans for the following week:
- Continue to work on finalizing the Microsoft Power App and manual guides.
- To prepare the slides and present Microsoft Power App to the Facilities team on 13 March 2026, which the head of Facilities will be attending.

Supervisor's remark:

StarRez and Demerit point system were presented to the team.

Supervisor signature: 

Date: 06 March 2026

Week 8 (9 Mar – 13 Mar 2026) Log

a) Activities / accomplishments for the week:
- Completed the inventory management system application demo and presented to the facilities management team. After the presentation, I received positive feedback on what they needed for them to record to further improvise the inventory management system in Power App.
- Assisted with the Iftar Gathering (10 Mar) in registration booth and Community Solidarity Gathering (11 Mar).

b) Top 3 problems encountered for the week and action taken:
- **Problem:** I wanted to add on a "Low Stock Automate Email Alert" into the application.
  Action: I searched the internet and also used Microsoft Copilot 365 and ChatGPT on implementation of these functions and the alert function was working now.

- **Problem:** I am uncertain on doing the system to support multiple residences, as the demo I present was relatively simple and only covered basic functionality.
  Action: I had explored the Power App and found that this request could be achieved by using filter function on the gallery, table, dropdown list and tab list to separate the user view for different residence.

c) Plans for the following week:
- Continue to enhance the Inventory Management System Power App and to fulfil the request from the facility management team (adding asset section, different page for different Residences, asset replacement form and others).
- Continued my presentation slides on the manual guides.

Supervisor's remark:

The presentation was well done. The Facilities head and the team were impressed with Jin Yon's contribution.

Supervisor signature: 

Date: 13 March 2026

Week 9 (16 Mar – 20 Mar 2026) Log

a) Activities / accomplishments for the week:
- Continued to enhance the Inventory Management System Power App and to fulfil the request from the facility team (adding asset section, asset replacement form and others).
- Continued my presentation slides on the manual guides.

b) Top 3 problems encountered for the week and action taken:
- **Problem:** I had faced challenges in adding new PDF report for the asset replacement form as it might have conflict with the existing inventory in/out report function.
  Action: I had sought help from Microsoft CoPilot 365 to understand if I can introduce this function to fulfil the requirement from facility team. After understanding the solution, I successfully developed and integrated the PDF report function without affecting the existing Inventory In/Out report.

c) Plans for the following week:
- Plan to complete the application and manual guides and transfer the application to facility team.
- Start on the research regarding Residence's door lock issues.

Supervisor's remark:

Supervisor signature: 

Date: 19 March 2026

Week 10 (23 Mar – 27 Mar 2026) Log

a) Activities / accomplishments for the week:
- Focused on solving problems encountering in Power App.
- Assisted on Birthday Party on 26 March (8.00PM - 9.00PM)

b) Top 3 problems encountered for the week and action taken:
- **Problem:** The application work well in the development environment. However, when the application was transferred to production environment, it required premium Power App license for us to be used.
  Action: I have discussed with my supervisor and tried to transfer the application to his account but it was unsuccessful. After searching from internet and asking AI tools, I found that the Dataverse is actually the premium feature, which did not state at the beginning of my app development process. From what I learnt, the application would need to be reconfigured by modifying the existing codes to accommodate the new data source from Excel files. As of today, majority of the problems in Power App are solved in Week 10.

- **Problem:** After I transfer the data source to Excel, the application was unable to provide real-time updates. This cause delays and inconsistencies in the displayed data.
  Action: I have tried with Microsoft SharePoint list as the data source. SharePoint List successful to provide real-time data updates like Dataverse.

- **Problem:** After changing the data source, the code inside the Power App need to modify again.
- **Action**: I have modified all the data source inside the code to ensure they connected properly.

c) Plans for the following week:
- Finalise the application and to transfer the application to the Facility Team.
- Finalise the presentation slides for the Power Apps's manual guides.
- Start on the research regarding Residence's door lock issues.

Supervisor's remark:

Jin Yon has been independently resolving the issues with the help of co-pilot and chat GPT. His determination on resolving issues, and subsequently the follows up were remarkable.

Date: 27 March 2026

Week 11 (30 Mar – 3 Apr 2026) Log

a) Activities / accomplishments for the week:
- Received the final request from the Facility Team to add new features to the application.
- Delivered a presentation on the Microsoft Power Apps manual guide.
- Started analysing the door lock issues in Sunway House Waterfront Residence.
- Assisted with the “Aloha Watefront!” Event (31 March 2026 7.00PM - 9.30PM) and Hari Raya Open House Event (2 April 2026 6.00PM - 9.00PM) before the event started and at the registration booth.

b) Top 3 problems encountered for the week and action taken:
- **Problem:** I have made a presentation focused on the developer side. However, they would like to have the manual guide on the user side.
  Action: I have created a new user manual presentation slide and combined them for their future reference if needed.

c) Plans for the following week:
- Finalised the application and transferred it to the Facility Team.
- Continued analysing the door lock issues and conducted research on student behaviour.

Supervisor’s remark:

The Facility Team was impressed with Jin Yon’s work.

Supervisor signature: 

Date: 10 April 2026

Week 12 (6 Apr – 10 Apr 2026) Log

a) Activities / accomplishments for the week:
- Received the request on adding license and tenancy expiry alert into the application
- After adding the license and tenancy expiry alert, I completed the application transfer process to facility team.
- Continued analysing the door lock issues in Sunway House Waterfront Residence with new data.

b) Top 3 problems encountered for the week and action taken:
- **Problem:** After I transferred the application from my school account to my supervisor's account, an error message popped up.
  Action: I checked the issue and found out that the issue was due to the exercise of data migration to SharePoint. The data types were not properly configured, which caused the application not able to read the data from SharePoint. After I made the adjustment, the application was working fine. On Friday, the application was successfully transferred to the Facility Team without any errors.

- **Problem:** When I wanted to transfer the application from my supervisor account to the facility team, her account does not have sufficient access to create a new space for the application
  Action: I tried to create a new environment (space) in facility team leader account, and it was successful. On Friday, the application was under the facility team.

- **Problem:** The problem occurred when the additional license and tenancy expiry alert needed to add into the Power Apps. I need to figure out the new access control for it.
  Action: At the beginning, I tried to add new access role. However, the system will only allow one user to get one role. Thus, if the person needs to have access to both inventory management and license & tenancy system, it will not work. Luckily, I found that I can used Yes/No feature to set the admin or user to have the access to enter license & tenancy page or not.

c) Plans for the following week:
- Completed my analysis and research about door lock issues in the Residence.

Supervisor's remark:

Once again, the Facility Team was impressed with the app Jin Yon has developed. Jin Yon is also capable to cope with any last minute request from them.

Supervisor signature: 

Date: 10 April 2026

Week 13 (13 Apr – 17 Apr 2026) Log

a) Activities / accomplishments for the week:
- Completed my analysis and research about door lock issues in the Residence.
- Assisted the facility team in becoming familiar with the application system.
- Completed all the tasks given to me.

b) Top 3 problems encountered for the week and action taken:
- **Problem:** The staff member from facility team were unfamiliar with how to use the application.
  Action: Provided guidance to help them understand the system's functions and workflow.

- **Problem:** There were some minor errors occurred when the facility team is key in the data.
  Action: I fixed the submit button as there was a command clash causing the input to reset before the update could be submitted.

c) Plans for the following week:
- Completion of Internship

Supervisor's remark:

Well done.
